3 to 5 Ton (34,000 to 52,500 Btuh)
Right Side Control Panel 60Hz

GREEN REFRIGERANT
R-410A

- High Efficiency
- Ultra Low Sound Level

The Bard CH "S" Series is the world's most energy efficient wall mounted heat pump. It has special sound reduction technology (patent applied for), and built with environmentally friendly non-ozone depleting refrigerant. Built-in sound reducing plenum is standard. Special sound and vibration curbs are also available for various wall construction, along with supply and return air acoustical plenums to further lower and help control sound levels as low as the mid-30's.

The Bard Wall-Mount Heat Pump is a self-contained energy efficient system, which is designed to offer maximum indoor comfort at a minimal cost without using valuable indoor floor space or outside ground space. This unit is the ideal product for versatile applications such as: new construction, modular offices, school modernization, portable structures or correctional facilities.

A slide-in dehumidifier option is available that fits completely inside the CH-Series heat pump. It can be factory or field installed and employs a completely separate refrigeration circuit from the main heat pump system.

Patented ventilation options are also available, as are additional control options to supplement the standard factory controls. Additional field installed installation options are available to meet specific job requirements.

Engineered Features

Multi-Capacity Two-Stage:

Simple thermostatic control seamlessly stages the compressor and indoor airflow rate between high and low capacity operations without cycling the compressor. This helps to maximize comfort, humidity control, energy efficiency and overall reduction in compressor cycling for improved system life.

Step Capacity Compressor:

Copeland step-capacity (2-stage) scroll compressors are designed for increased efficiency, quieter operation and improved reliability for longer life. Mounted on isolation rails with double grommets. Insulated sound cover system is standard.

Current Sensing Relay:

Specially designed relay detects high amps caused by high ambient or low voltage conditions, and drops compressor to 1st stage to keep on-line until voltage condition is corrected.

R-410A Refrigerant:

Designed with R-410A (HFC) non-ozone depleting refrigerant in compliance with the Montreal protocol and 2010 EPA requirements.

Liquid Line Filter Drier:

Protects system against moisture.

Aluminum Finned Copper Coils:

Grooved tubing and enhanced louvered fin for maximum heat transfer and energy efficiency.

Twin Blowers:

Move air quietly. All models feature variable speed blower motors providing automatic airflow adjustment for high static or free blow (non-ducted) operation at a very low sound level. Motor overload protection is standard on all models.

ECM Indoor Blower Motor:

Features a variable speed motor providing super-high efficiency, low sound levels and soft-start capabilities. The motor is self-adjusting to provide the proper airflow rate for the staged capacity, and for higher static pressure in ducted installations without user adjustment or wiring changes.

Ventilation Controller:

Standard with CHCRV-5 Commercial Room Ventilator. Automatically adjusts damper position to maintain the desired ventilation airflow rate up to 480 cfm of fresh air during any operation mode. Fully closes during unoccupied modes. Factory set for 480 cfm. Also, CO₂ sensor ready - just add CO₂ sensor for demand ventilation based on CO₂ level in the space.

Solid State Electronic Heat Pump Control:

Provides efficient 30, 60 or 90-minute defrost cycle. A thermistor sensor, speed up terminal for service and 10-minute defrost override are standard on the electronic heat pump control. 5-minute compressor short cycle protection is standard.

Emergency Heat Circuit:

Permits continuous operation of the system.

High & Low Pressure Switches are Auto-Reset

Built-in lockout circuit resets from the room thermostat. Provides commercial quality protection to the compressor.

Crankcase Heaters:

Factory installed crankcase heaters are standard on all models. This helps to insure ease of start at low temperatures and improves compressor life.

Phase Rotation Monitor:

Standard on all 3 phase scroll compressors. Protects against reverse rotation if power supply is not properly connected.

Pre-Painted 20 Gauge Zinc Coated Steel Cabinet:

Cleaned, rinsed, sealed and dried before the polyurethane primer is applied. The cabinet is handsomely finished with a baked on textured enamel, which allows it to withstand 1000 hours of salt spray tests per ASTM B117-03.

Pre-Painted 16 Gauge Zinc Coated Unit Base:

The unit base is treated with the same paint coatings as the cabinet above, insuring years of service without visible corrosion.

Drain Pan:

The evaporator drain pan is constructed of stainless steel material for maximum corrosion resistance.

Electrical Components:

Are easily accessible for routine inspection and maintenance through a right side, service panel opening. Features a lockable, hinged access cover to the circuit breaker or toggle disconnect switch.

Electric Heat Strips:

Features line break automatic limit and dual backup safety controls. Heater packages can be factory or field installed for all models.

Two-Inch, Pleated Disposable Air Filters:

Are standard equipment.

Condenser Fan and Motor Shroud Assembly:

Slides out for easy access.

Circuit Breakers/Rotary Disconnect:

Standard on all versions of single (230/208 volt) and three phase (230/208 volt) equipment. Rotary disconnects are standard on all versions of three phase (460 volt) equipment.

Slope Top:

Standard feature for water run-off.

Full Length Mounting Brackets:

Built into cabinet for improved appearance and easy installation.

Top Rain Flashing:

Standard feature on all models.

Certified Capacity and Efficiency Ratings at Full Capacity

① Rated CFM for 2nd Stage cooling (wet coil) and 2nd Stage heat pump mode.

See Indoor Blower Performance table on page 9 for complete details.

- Complies with efficiency requirements of ASHRAE/IESNA 90.1-2007.
- Certified to ARI Standard 390-2003 for SPVU (Single Package Vertical Units).
- Intertek ETL Listed to Standard for Safety Heating and Cooling Equipment ANSI/UL 1995/CSA 22.2 No. 236-05, Third Edition.
- Commercial Product - Not intended for Residential application.

Ventilation System Packages

Bard Wall-Mounts are designed to provide optional ventilation packages to meet all of your ventilation and indoor air quality requirements. All units are equipped with a blank off plate as the standard ventilation package. All ventilation packages can be built-in at the factory, or field-installed at a later date.

BLANK OFF PLATE - BOP

STANDARD

A blank off plate is installed on the inside of the service door. It covers the air inlet openings, which restricts any outside air from entering the unit. The blank off plate should be utilized in applications where outside air is not required to be mixed with the conditioned air.

COMMERCIAL ROOM VENTILATOR

COMMERCIAL ROOM VENTILATOR - CHCRV-5

OPTIONAL

The built-in commercial room ventilator is internally mounted behind the service door and allows outside ventilation air, up to 50% of the total airflow rating of the unit, to be introduced through the air inlet openings. It includes a built-in exhaust air damper with integral bug screen. Automatic control is integrated to maintain desired ventilation air at the various supply airflows while on Stage 1, Stage 2 or ventilation modes of operation.

The commercial room ventilator (CRV) is a simple and innovative approach to improving the indoor air quality by providing fresh air intake and exhaust capability through the CRV. The damper can be easily adjusted to control the amount of fresh air supplied into the building. The CRV can be controlled by indoor blower operation or field controlled based on room occupancy. The CRV is power open - spring return on power loss. Complies with ANSI/ASHRAE Standard 62.1 "Ventilation for Acceptable Indoor Air Quality."

CO₂ Sensor Ready

- The CHCRV is designed for CO₂ based ventilation control by simply wiring in a field installed CO₂ sensor if desired.

ECONOMIZER

ECONOMIZER - CHEIFM-5

OPTIONAL

The built-in economizer system is internally mounted behind the service door and allows outdoor air to be introduced through the air inlet openings. The amount of outdoor air varies in response to the system controls and settings defined by the end user. It includes a built-in exhaust air damper. The economizer is designed to provide "free cooling" when outside air conditions are cool and dry enough to satisfy cooling requirements without running the compressor. This in turn provides lower operating costs, while extending the life of the compressor.

Standard Features:

- One Piece Construction - Easy to install with no mechanical linkage adjustment required.
- Exhaust Air Damper - Built in with positive closed position. Provides exhaust air capability to prevent pressurization of tight buildings.
- Actuator Motor - 24 volt, power open, spring return with built in torque limiting switch.
- Proportioning Type Control - for maximum "free cooling" economy and comfort.
- Moisture Eliminator & Prefilter - permanent, washable aluminum construction.
- Enthalpy Control - adjustable to monitor outdoor temperature and humidity.
- Minimum Position Potentiometer - adjustable to control minimum damper blade position for ventilation purposes.
- Mixed Air Sensor - to monitor outside and return air to automatically modulate damper position.

ENERGY RECOVERY VENTILATOR

WALL-MOUNT ENERGY RECOVERY VENTILATOR - CHERV

OPTIONAL

The wall-mount energy recovery ventilator (CHERV) is a highly innovative approach to meeting indoor air quality ventilation requirements as established by ANSI/ASHRAE Standard 62.1. The CHERV allows from 200 to 450 CFM (depending upon model) of fresh air and exhaust through the unit while maintaining superior indoor comfort and humidity levels. In most cases, this can be accomplished without increasing equipment sizing or operating costs. Heat transfer efficiency is up to 67% during summer and 75% during winter conditions.

The CHERV consists of a unique "rotary energy recovery cassette" that provides effective sensible and latent heat transfer capabilities during summer and winter conditions. Various control schemes are addressed including limiting ventilation during building occupancy only.

The CHERV is designed to be internally mounted behind the service door in the CHS model Wall Mount units. It can be built-in at the factory or field installed as an option.

Manufactured under U.S. Patent Nos. 5,485,878; 5,301,744; 5,002,116

① These "Minimum Circuit Ampacity" values are to be used for sizing the field power conductors. Refer to the National Electrical code (latest version), Article 310 for power conductor sizing.
Caution: When more than one field power circuit is run through one conduit, the conductors must be derated. Pay special attention to note 8 of Table 310 regarding Ampacity Adjustment Factors when more than three (3) current carrying conductors are in a raceway.

② Maximum size of the time delay fuse or HACR type circuit breaker for protection of field wiring conductors.

③ Based on 75°C copper wire. All wiring must conform to the National Electrical Code and all local codes.

④ Maximum KW that can operate with the heat pump on is 10KW for 1-phase and 9KW for 3-phase.

* Top outlet supply option is available only factory installed and only on the selected models.

IMPORTANT: While this electrical data is presented as a guide, it is important to electrically connect properly sized fuses and conductor wires in accordance with the National Electrical Code and all local codes.

③ 70°F DB indoor return air at rated CFM includes defrost operation below 45°.

Indoor Blower Performance - CFM (0.00" through 0.50" H₂O) ①

Model	Rated ESP	① Max ESP	② 2nd Stage Cooling 2nd Stage Heating	③ 1st Stage Cooling 1st Stage Heating	④ Blower Only or Vent Mode	Electric Heat
CH3S1	.15	.5	1100	800	800	1100
CH4S1	.2	.5	1500	1100	850	1700
CH5S1	.2	.5	1700	1300	850	1700

NOTE: These units are equipped with a variable speed (ECM) indoor motor that automatically adjusts itself to maintain approximately the same rate of indoor airflow in both heating and cooling, dry and wet coil conditions and at both 230/208 or 460 volts.

- ① Maximum ESP (inches WC) shown is with 2" thick disposable filter.
- ② Rated CFM for 2nd Stage Operation – required for maximum performance rating.
- ③ 1st Stage – the CFM output on 1st Stage Heating or Cooling.
- ④ Blower only CFM is the total air being circulated during continuous fan mode.

CHDM Slide-In Dehumidifier Option

The CHDM Dehumidifier is a unique dehumidifier concept employing a completely separate refrigeration circuit from the main heat pump system, yet fits completely inside the basic heat pump cabinet.

Standard Features:

- Independent refrigerant circuit
- Completely self-contained, designed to slide into CH Series Heat Pumps
- Factory installed or field installed in minutes
- 230/208-60-1, wires into main unit control panel (also used in 460V models). Does not increase unit wire size.
- R-410A Green Refrigerant, same as base CH Heat Pump
- Controls humidity during occupied or unoccupied periods
- Operates in conjunction with main heat pump in Stage 1 cooling or heating modes (inhibited during 2nd stage compressor operation).
- Uses independent humidistat, and dehumidifies return air from the room and therefore is a true humidity control system.
- CHDM weight - 96 lbs.

CHDM Dehumidifier Performance---Water Removal Lbs/Hour (Lbs/Day)							
Dry Bulb Temp F	Relative Humidity % RH						
	50	55	60	65	70	75	80
65	1.0 (24.0)	1.3 (31.2)	1.5 (36.0)	1.7 (40.8)	2.0 (48.0)	2.2 (52.8)	2.4 (57.6)

Installation with Standard Front Outlet and Front Installation & Isolation Curb

Installation with Optional Top Outlet, Top Outlet Plenum Box and Top Outlet Installation & Isolation Curb

Installation with Optional Top Outlet, Field Supplied Duct and Front Outlet Installation & Isolation Curb

Installation with Standard Front Outlet and Front Installation & Sound Curb

Required only to replace older units with 30" spacing SA to RA

Optional Installation Accessories

Description	Model	Color	Shipping Weight (Lbs)
Isolation Curb	WMICF5-X	Beige	125
Front Supply Air Outlet	WMICF5-4	Buckeye Gray	125
	WMICF5-5	Desert Brown	125
	WMICF5-8	Dark Bronze	125
Isolation Curb	WMICT5-X	Beige	140
Top Supply Air Outlet	WMICT5-4	Buckeye Gray	140
	WMICT5-5	Desert Brown	140
	WMICT5-8	Dark Bronze	140
Sound Curb	WMSC5-X	Beige	180
Front Supply Air Outlet	WMSC5-4	Buckeye Gray	180
	WMSC5-5	Desert Brown	180
	WMSC5-8	Dark Bronze	180
Top Outlet Plenum Box	CPB5A-X	Beige	35
	CPB5A-4	Buckeye Gray	35
	CPB5A-5	Desert Brown	35
	CPB5A-8	Dark Bronze	35

Heat Pump Wall-Mount Model Nomenclature

Note: Circuit breakers standard on 230/208 Volt; rotary disconnect standard on 460 Volt models.

① Not suitable for use with dehumidification module.

Ventilation and Dehumidifier Options

Models	CH3S1, CH4S1, CH5S1	
	Factory Installed Code No.	Field Installed Part No.
Blank-Off Plate	B	BOP-5
Commercial Ventilator - Motorized	V	CHCRV-5
Economizer - Fully Modulating	E	CHEIFM-5*
Energy Recovery Ventilator-Independent Intake/Exhaust Control - 230 Volt	R	CHERV-A5*
Energy Recovery Ventilator-Independent Intake/Exhaust Control - 460 Volt	R	CHERV-C5*
Dehumidifier and Blank-Off Plate	1	CHDM & BOP-5
Dehumidifier and Commercial Ventilator	2	CHDM & CHCRV-5*
Dehumidifier and Energy Recovery Ventilator	3	CHDM & CHERV-A5* or -C5* ①

* Color Option must be specified to match unit ("X" = Beige; "4" = Buckeye Gray; etc.)

① Match voltage to basic unit.

Heat Pump Control Modules

AVAILABLE CONTROL OPTIONS				CH3S1, CH4S1, CH5S1 Models with Scroll Compressors	
HPC①	LPC ②	LAC ③	ODT	Factory Installed Code	Field Installed Part
STD	STD			X	N/A
STD	STD	● 230V	④	E	CMH-17
STD	STD	● 460V	④	E	CMH-18

STD = Standard equipment for these specified models.

① HPC. High pressure control is auto reset.

② LPC. Low pressure control is auto reset.

③ LAC. Modulating low ambient control permits cooling operation down to 0°F.

④ ODT. Outdoor thermostat. Field-installed only. Bard Part #8403-061.

Comes with weatherproof enclosure. Works in conjunction with multi-stage thermostats offered by Bard and can be configured for any or all of compressor cut-off in heat pump mode, minimum cooling mode and maximum electric heat operation based on outdoor temperature.

Thermostat Options:

8403-060 Temperature/Humidity Controller, 2C/3H Programmable or Non-Programmable

8403-052 Thermostat, 2C/3H Programmable

8403-053 Thermostat, 2C/3H Programmable with LonTalk board

8403-055 Thermostat, 2C/3H Programmable with BACnet board

Accessory Options – Field-Installed

MODELS	CH3S1, CH4S1, CH5S1	
Description	Field-Installed Part Number	Shipping Weight
Outdoor Coil Drain Pan (Stainless Steel)	DPCH	10
